Saint-Gobain aims to reduce the CO2 emissions of its operations by 20% by 2020, compared to 2010 at its production sites. In line with this objective, the Group displayed a reduction of its emissions of nearly 12% by end of 2018, which, in absolute terms and taking into account the evolution of the portfolio of Saint-Gobain since 2010, represents a reduction by more than one third. In September 2019, Saint-Gobain committed to reach net-zero carbon emissions by 2050, signing the pledge of the Global Compact “Business ambition for 1.5°C”.

United Technologies (UTC) reduced its GHG emissions by nearly 30% in absolute terms between 2006 and 2014. For 2020, the objective is to further reduce these by 15% compared to 2015 levels. We have made some bold promises that we’ll deliver on by 2020, compared to 2007. We also want to optimise our material and GHG emissions in its own office buildings by at least 20%, signing the pledge of the Global Compact “Business ambition for 1.5°C”.

In addition, with its CARE:4® programme, the company aims at reducing fourfold the overall energy consumption and GHG emissions in its own office buildings by 2040. Saint-Gobain has set, for its operations, a 20% CO2 emissions reduction compared to 2010. Between 2010 and 2015, one third of the 20% CO2 emissions reduction, i.e. a progress of 28% towards achieving its goal. Compared to 2010, it noted a 6% reduction in CO2 emissions from its processes. In 2012, it reached its first reduction in CO2 emissions from all its business activities, all of them have been awarded ISO 9000 certificates, which guarantees a high level of operational performance.

In VELUX factories 97% of waste materials are used for water heating, electrical appliances and lighting. The goal is 50% reduction by 2020 compared to its 2007 baseline. We also want to optimise our material efficiency and eliminate waste from production. In VELUX factories 57% of waste materials are recycled or used for heat generation, reducing our impact on the environment.

URSA has shown its commitment to reducing the energy used in its production process. In 2012, it noted a 6% reduction in CO2 emissions from all its business activities, all of them have been awarded ISO 9000 certificates, which guarantees a high level of operational performance.

Saint-Gobain member companies have been providing energy efficient building materials, products, equipment and services for decades. But they are also committed to achieving energy savings in their own factories and office locations. Our members employ more than 200,000 people at over 900 production facilities and office locations in the EU.
By 2022, Armacell aims to reduce its total energy consumption by 30% of its energy mix by 2050. The company focuses on quality and efficient production and has developed reliable systems to reduce production scrap and reduce the total waste generated. Armacell’s European manufacturing facilities are certified in accordance with the international environmental standard ISO 14001, to encourage the development of energy-efficient solutions. Our focus is to be the global leader in providing innovative, technical solutions in adhesives and adhesives to conserve energy and make a difference in the world.

In 2018, Kingspan Group reached 16% towards its commitment to become a Net Zero energy business. It has been providing improved site energy and end-user energy efficiency initiatives since 2011. In 2012, the company committed to becoming a Net Zero energy business, with targets in place for 2020. The company has increased its use of new renewable energy sources, and has been reducing its carbon footprint by continuing to improve energy efficiency. In 2019, the company achieved a 30% reduction in energy consumption from production activities compared to 2016 levels.

At Signify, we take seriously the global need to address the climate crisis. We’re leading the industry-wide Global Lighting Challenge. In 2019, we surpassed our target to sell 2 billion high-efficiency LED light bulbs, as part of the industry-wide Global Lighting Challenge.
