

“A “deep” thinking around Minimum Energy Performance Standards”
Wednesday 5 May 2021, 10:00-11:15 CET
Via GoToMeeting

WEBINAR SERIES

**Future-proof EPBD: Let’s deliver
beyond the Renovation Wave!**

FIRST WEBINAR

**A “deep” thinking around Minimum
Energy Performance Standards**

5 May 2021, 10:00 - 11:15 CET

REGISTER HERE

EuroACE would like to invite you to an upcoming webinar entitled “A “deep” thinking around Minimum Energy Performance Standards”, which will take place on **Wednesday 5 May 2021 (10:00-11:15 CET)** via **GoToMeeting**.

In the context of the ongoing public consultation on the Energy Performance of Buildings Directive (EPBD), we are hosting a series of three webinars focusing on different aspects of the EPBD which have the potential to considerably increase energy renovation rates in the EU. The series, entitled “*Future-proof EPBD: let’s deliver beyond the Renovation Wave!*”, will feature conversations around the development of Minimum Energy Performance Standards (MEPS), the update of Energy Performance Certificates and other buildings information tools such as the Digital Building Logbook and Smart Readiness Indicator as a way to boost digitalisation of our buildings while improving their data.

This first webinar will explore the introduction of MEPS, their regulatory nature and how these policy instruments fit into the EPBD ‘architecture’ (i.e. alignment with the EU climate goals, linkages with long-term renovation strategies, etc.). We will also look at which embedded elements could support their rapid roll-out and help ensure higher and deeper renovation rates for buildings in the EU.

Draft Agenda

- 10:00** | **Opening remarks and guidance to participants** - Adrian JOYCE, EuroACE
- 10:10** | **Introducing MEPS via the EPBD: where to start?** - Jonathan VOLT, Buildings Performance Institute Europe (BPIE)
- 10:20** | **How to design and implement MEPS? A deep dive into best practices and examples** - Louise SUNDERLAND, Regulatory Assistance Project (RAP)
- 10:30** | **OSS as embedded framework to support MEPS: the ORFEE model** - Françoise REFABERT, ORFEE (**tbc**)
- 10:40** | **Q&A Session moderated by:** Adrian JOYCE, EuroACE
- 11:05** | **Conclusions** - Adrian JOYCE, EuroACE

About the organisers:

 **EuroACE - Energy Efficient Buildings**

EuroACE represents Europe's leading companies involved with the manufacture, distribution and installation of energy saving goods and services for buildings. EuroACE members employ more than 220,000 people in these activities in Europe and have over 1,100 production facilities and office locations. The mission of EuroACE is to work together with the EU institutions to help Europe move towards a more efficient use of energy in buildings, thereby contributing to Europe's commitments on climate change, energy security and economic growth.
