Long-term planning and digitalisation as key enablers for successful energy renovations

Tuesday, September 20, 2022
9:00 - 10:30 CET
Online

BEreel! LIFE IP CA 2016 BE-REEL! INZEB INITIALISING ENERGY BALANCE TOWARDS ZERO EuroACE Energy Efficient Buildings SUSTAINABLE ENERGY WEEK

REGISTER HERE

EuroACE is very pleased to announce that together with BE REEL! and INZEB we will be holding an online event during the extended programme of this year’s **EU Sustainable Energy Week**.

The session will show **how future-proof planning and digitalisation can support authorities and citizens in reducing energy demand of EU buildings** in the context of high energy prices, the EPBD revision and optimising living conditions by showcasing best practices and initiatives that are already in place at national, regional and building level to inspire further action.

As an example, future-proof planning can facilitate the roll-out of minimum energy performance standards and ensure that all buildings are part of deep or staged deep renovation trajectories. **Digital tools and data have proven to be incredibly helpful to authorities for planning the renovation of their building stock but also to citizens for the renovation of their own dwelling.**

Moderator

- Céline Carré, President of EuroACE

Speakers

- Sean Kelly, Member of the European Parliament (EPP, IE) *
- Daniela Bachner, Project Adviser, LIFE Energy, European Climate, Infrastructure and Environment Executive Agency (CINEA)
- Hakim Lahlou, Directeur Innovation et Stratégie Grand Groupes à la Direction des Prêts, Banque des Territoires
- Roel Vermeiren, Renovation Strategy Consultant, Flemish Energy & Climate Agency
- Alice Corovessi, Managing Director, INZEB

* TBC

Rond Point Schuman, 6 - 8th floor
B-1040, Brussels, Belgium

About EuroACE - Energy Efficient Buildings

EuroACE represents Europe’s leading companies involved with the manufacture, distribution and installation of energy saving goods and services for buildings. EuroACE members employ more than 220,000 people in these activities in Europe and have over 1,100 production facilities and office locations. The mission of EuroACE is to work together with the EU institutions to help Europe move towards a more efficient use of energy in buildings, thereby contributing to Europe’s commitments on climate change, energy security and economic growth.
