# RENOVATING HISTORY

How to bring historic  
buildings into the  
21st century

Monday 11 July 2022  
10:30 - 11:30

Event moderated by

Céline Carré, President of  
EuroACE

Speakers

Marco Mari,  
Italian Green Building Council

Alexandra Troi,  
Eurac Research

MEP Marcos Ros Sempere  
(S&D, Spain)

**REGISTER HERE**

EuroACE – Energy Efficient Buildings invites you to the upcoming webinar “*Renovating History: how to bring historic buildings into the 21st century*”, which will take place on **Monday 11th of July 2022 at 10:30 – 11:30**.

The need to urgently reduce the EU’s dependency on Russian fossil fuels and at the same time to transform our buildings to be highly energy efficient and decarbonised by 2050 requires us to take into account the entire building stock. A sizable proportion of the existing building stock in the EU can fall into the category of historic, heritage and other protected buildings, many of which are amongst the worst-performing buildings in terms of energy consumption.

It is therefore imperative that they must be taken into account in the design of future national buildings renovation plans and policy measures to meet the EU’s climate objectives by improving their energy performance and reducing CO2 emissions while also improving living conditions.

This webinar will **demonstrate opportunities for energy renovation of historic buildings**. Speakers will present **practical solutions**, such as the [HiBERAtlas](#) project and the Italian Green Building Council’s

[certification scheme](#), and will discuss possible approaches to tackle this topic at EU and local level with the contribution of **MEP Marcos Ros Sempere**, shadow rapporteur on the EPBD within the Parliament's ENVI Committee.

## Agenda

### Introduction

Céline Carré, President at EuroACE

### Practical solutions and strategies for the renovation of historic buildings

- The GBC Historic Building certification scheme  
*Marco Mari, President, Italian Green Building Council*
- The IEA EBC Annex 76 on renovating historic buildings and the HiBERAtlas project  
*Alexandra Troi, Vice Head of the Renewable Energy Institute, Eurac Research*

### The importance of not leaving historic buildings behind

Marcos Ros Sempere, MEP (S&D, Spain), European Parliament

### Discussion

### Wrap-up

Céline Carré, President at EuroACE

About the organisers:

- EuroACE - Energy Efficient Buildings**

EuroACE represents Europe's leading companies involved with the manufacture, distribution and installation of energy saving goods and services for buildings. EuroACE members employ more than 220,000 people in these activities in Europe and have over 1,100 production facilities and office locations. The mission of EuroACE is to work together with the EU institutions to help Europe move towards a more efficient use of energy in buildings, thereby contributing to Europe's commitments on climate change, energy security and economic growth.

- EuroACE Members (2022)**
